

# lorica™

Lorica is Skretting's most advanced functional feed, for shrimp at NURSERY stage, and is designed to strengthen the shrimp before and during environmental and bacterial challenges.

## Features:-

### ① Shield:

- a) Strengthening essential barriers
- b) Functional ingredients
- c) Population safeguarding

### ② Support:

- a) Enhanced immune system
- b) Safeguarding nutrients

### ③ Balance:

- a) Withstanding threats
- b) Easing bacterial impact

## Benefits:-

1. Supports against environmental stress.
2. Invaluable support to shrimp's hepatopancreas function.
3. Eases bacterial impact and inhibit communication between bacteria

## Nutrition Facts:-

Feed Code	Type of feed	Protein (% min)	Fat (% min)	Fiber (% max)	Moisture (% max)
Lorica 0	Powder	40	5	3	10
Lorica 1	Crumble 18 - 25 mesh	40	5	3	10
Lorica 2	Pellet 1.0 x 1.5-2 mm	40	5	4	10

## Advantages:-

1. Improves the structure of the gut and hepatopancreas.
2. Enhances the immune system.
3. Makes PL strong and active.
4. Ensures size uniformity and better survival rates.
5. Better performance in grow-out pond.

## Case Studies:

<b>Farm</b>	Tandel Shrimps
<b>Farmer Name</b>	Vasubhai Tandel
<b>Village &amp; Area</b>	Bhat, Gujarat
<b>Species</b>	Vannamei
<b>Hatchery</b>	CP Gujarat
<b>Feed</b>	LORICA
<b>Nursery Area (sqm)</b>	1,000
<b>Days of Culture</b>	31
<b>Total seed stocked (million)</b>	2.5
<b>Total Seed shifted (million)</b>	2.4
<b>ABW (gms)</b>	0.65
<b>Total Biomass shifted (kgs)</b>	1,575
<b>Survival (%)</b>	96%
<b>Total Feed Used ( in Kg )</b>	955
<b>FCR</b>	0.6
<b>Remarks</b>	Lorica feed size is optimal both in crumble and pelleted formats. The feed is of superior quality and helps maintain water quality. The results were excellent on the grow out farm too.
