

STELLA S

COMPLETE EXTRUDED FLOATING FEED FOR SNAKEHEAD

Skretting Stella S is a high quality floating feed range specially designed for snakehead species cultured in ponds from fingerling to harvest. The diets have a high level of digestible proteins and essential amino acids following the requirements of these carnivorous species. The protein to energy ratio is optimized to achieve a fast growth while maintaining a low FCR.

All ingredients are purchased from sources approved by the Skretting group. Quality controls are systematically performed to ensure maximum digestibility, palatability and avoid any contaminant.
