

Santron

Ultimate Gut Conditioner

Santron is a synergistic blend of target release butyrate, short and medium chain fatty acids, slow release C12 and phenolic compound that enhances the gut health to improve performance and profitability of farms.

Santron's unique formulation supports in:

Strengthening of intestinal barrier and reduction of gut inflammation

Better nutrient absorption

Increasing microbial diversity to support beneficial bacteria growth

Inhibiting pathogenic bacteria

Maintaining intestinal health and growth under challenging farming conditions

Why Santron?

Economics

Better overall health status during the culture has a positive influence on the performance and ROI of the farm

Efficient Culture

Improved gut barrier function and stabilized microbiota are critical for strong gut health and in turn efficient culture

Sustainability

Improves profitability in antibiotic free farming practices

Santron improves the survival of shrimp against Vibrio

Survival during challenge | Trial 1

Survival during challenge | Trial 2

Conclusion

In different trials, Santron improved relative survival against acute hepatopancreatic necrosis disease (AHPND/EMS) by around 50%.

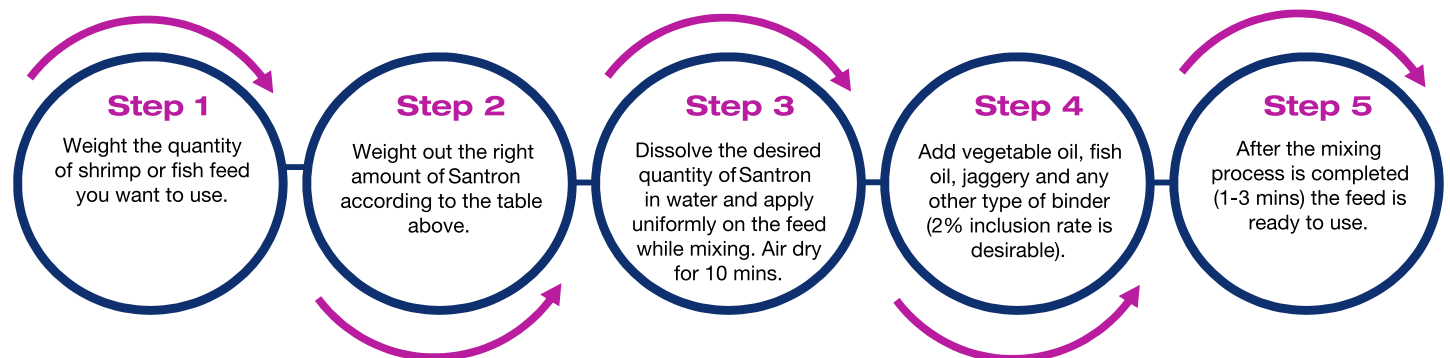

How to use Santron

Condition	FISH		SHRIMP	
	Normal (g/kg of feed)	Challenge (g/kg of feed)	Normal (g/kg of feed)	Challenge (g/kg of feed)
Nursery	2	5	5	10
Grow-out (<80 pcs/m ²)	1	3	2	5
Grow-out (>80 pcs/m ²)			5	10

Under normal conditions, Santron can be fed continuously for maintaining optimal gut health.

Under challenging conditions such as reduced appetite, digestive problems and gut inflammation use Santron as per the recommendation for 1-2 weeks or as long as the challenge persists.

Top-coating recommendation:
