

AOcare Mineral Balance[®]

Perfect mineral blend - Healthy fish and shrimp

- ✓ Maintaining ionic balance
- ✓ Supporting muscle and nerve function
- ✓ Enhancing molting and shell development

AOcare Mineral Balance[®] help to restores mineral balance in pond water with a proprietary combination of macro mineral and trace elements, highly concentrated and bioavailable. This ionic balance between major components supports shrimp to adapt faster to environmental changes and different salinities. Moreover, when applied at the right dose and frequency, AOcare Mineral Balance can help to reduce production costs.

AOcare Mineral Balance is a high bioavailable form of the 3 main minerals, Magnesium, Calcium and Potassium in their ionic balance 3:1:1. This product support moulting and exoskeleton development and hardening.

AOfcare Mineral Balance[®]

Perfect mineral blend - Healthy fish and shrimp

OUTSTANDING PRODUCT FEATURES

AOfcare Mineral Balance

- A proprietary combination of both macro minerals (Ca, Mg, K, Na, S) and trace minerals (Zn, Mn, Se and Si)
- Ionic balance between major components
- Highly concentrated and bioavailable
- Cost-effective when applied at the right dose and frequency

Aofcare Mineral Balance support shrimp to adapt faster to different environmental conditions. The highly bioavailable formulation contains macro and trace minerals that helps maintain the mineral balance in pond water.

For optimal result, Aofcare Mineral Balance should be used as part of an integrated approach that includes water, feed, health and farm management.

Aofcare Mineral Balance is beneficial for

Maintenance of the ionic balance for good growth conditions

Osmoregulation

Moulting and exoskeleton development

Shrimp physiology and muscle function
