

**Vitalis PRIMA**  
Maximum vitality for offspring

Vitalis PRIMA is Skretting's latest development in marine fish broodstock nutrition, supporting the health of parent fish, egg and larval quality and improving the performance of hatchery systems globally. Vitalis PRIMA should be used during the gonad development, spawning and recovery period, followed by Vitalis REPRO.

#### VITALIS PRIMA IS SKRETTING'S OPTIMAL DIET FOR MARINE BROODSTOCK ENRICHMENT

Optimised nutritional formulation for broodstock reproduction

Consistent high quality and palatability

Improved compatibility with RAS

Support health and robustness

Improved biosecurity and sustainability

# Optimised nutrition

The maturation and reproductive process in marine fish is a complex process of hormonal developments. During this process, marine fish typically require the use of a highly specific diet, capable of boosting the fecundity rates and improving the quantity and quality of the eggs and larvae.

Positive effect on fecundity

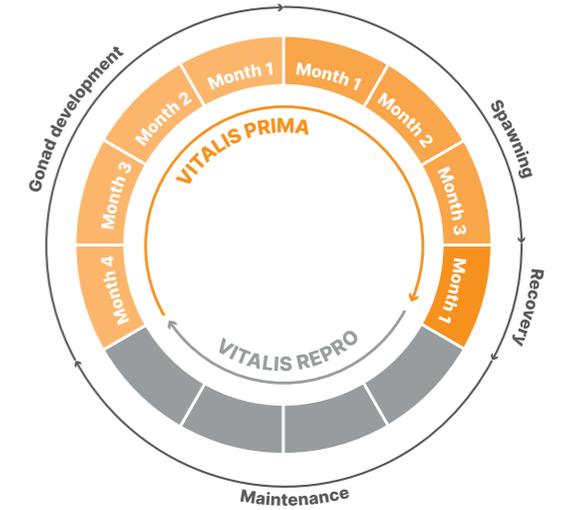

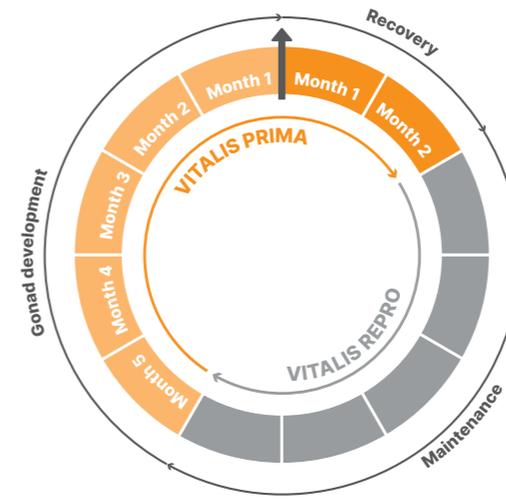

more eggs

Sea Bass

Sea Bream

# Support health and robustness

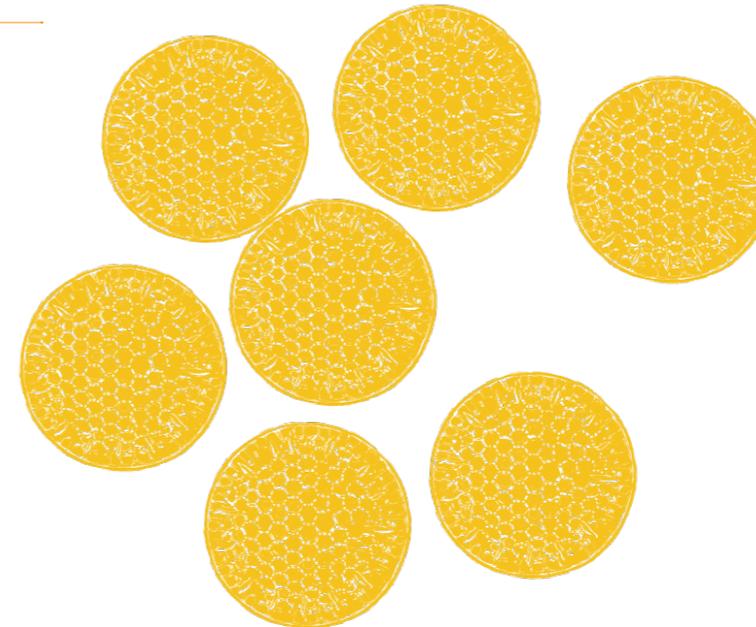

## VITALIS PRIMA INCLUDES PROTEC CONCEPT THAT:

- Shield skin, intestine and gills
- Support immune function limiting oxidative stress
- Balances the complex interaction between the fish and its environment

**Vitalis PRIMA** improves the appearance and vitality of the fish and increases the antioxidative capacity within the feed and the eggs

# Improved biosecurity and sustainability

**RAS compatibility**

**Improved biosecurity**

**Improved sustainability**

Skretting is the global leader in providing innovative and sustainable nutritional solutions and services for the aquaculture industry. Skretting has production facilities in 19 countries on five continents, and manufactures and delivers high quality feeds from hatching to harvest for more than 60 species. The total annual production volume of feed is more than 2 million tonnes. The head office is located in Stavanger, Norway. Our purpose is #FeedingTheFuture
